GET STARTED NOW

Canon.com/ijsetup the five-ink system gives great quality photo prints and the large touchscreen makes it especially easy to use. The print speed is a little slow, even for an inkjet, but it is well featured with both Bluetooth and Wi-fi connectivity and a handy SD-Card slot at the front.

DOWNLOAD CANON PRINTER || [CANON.COM/IJSETUP](https://www.canon.com/ijsetup)

- Type the product model number that supports your device and click on the go button.
- Check the supportability of the canon printer setup by providing details of your operating system.
- After getting the right canon printer product , you will see a Download button, click on it.
- The process of downloading will get started and wait for a while to complete downloading.
- Now, the setup file is successfully downloaded.

INSTALL CANON PRINTER FOR YOUR WINDOWS SYSTEM

1. The first step is to locate the downloaded canon printer setup file.
2. Now, double-click the canon.com/ijsetup file and open it.
3. A new window “**User Account Control**” will appear and it will ask permission.
4. Permit the same by clicking on the “**Yes**” button.
5. Agree to the terms and conditions of it. Click “**I Agree**” to continue the process of installation.
6. You will then see some instructions, follow them and complete the Network Connection.
7. Then, wait for the process to complete successfully.
8. Finally, click “**Exit**” on the “**Installation Complete**” window.
9. Your installation process is complete.

GUIDELINES TO SETUP CANON PRINTER ON WINDOWS

1. To begin, go to ‘ canon.com/ijsetup ’ and install software your printer’s driver.
2. Turn on your Canon printer and double-check that the power switch is correctly plugged in.
3. After that, open the downloaded driver setup file and click next until you reach the screen where you may select “Wireless Setup.”
4. Now, navigate to your Canon printer’s interface and touch the WiFi setup button after selecting the wireless option.
5. Click OK after selecting the device settings.
6. Next, Choose Device Settings>LAN Settings and press ‘OK’ button
7. LAN Settings>Wireless Lan Setup and press on ‘OK’. Now your printer will search for access point.
8. Make sure you turn on your WiFi router. WiFi flashlight is now going to blink on the printer.
9. Next on the screen is a network list. Select from the list your WiFi network and click ‘OK.’
10. Show your **WPA/WEP** key (WiFi password). Enter the right password and click “OK.”
11. Your printer can connect to the WiFi network in a few moments.
12. You may therefore quickly complete the wireless Canon ij setup for your Windows machine by using the preceding instructions.

GUIDELINES TO SETUP CANON PRINTER ON MAC

1. First, download and setup the driver through canon.com/ijsetup Mac.
2. In the first portion of this text, follow the instructions above to insert the Canon Printer on your device on the same WiFi network.
3. Then open the Apple menu and then click on System Preferences. Open System Preferences.
4. Now, from the system preferences window click the printer shaped icon called **“Printers and scanners.”**
5. Click the **“+”** sign in the bottom left of the screen, which shows a pop window.
6. If it is connected already through the network, you may see your printer name in the left pane. To start the setup procedure, click on it.
7. Check and you're going to be ready for use.
